

Subject: PEFS LOP Valves manufactured before 2012

Product: PEFS

Parts: Part Number 118554

PEFS LOP valves manufactured before 2012 were supplied with a **silver warning label** and engraved with **“CHUBB 1460 kPa” and the month/year of manufacture.**

LOP valves manufactured after 2012 are engraved with **“CHUBB” and the month/year of manufacture only.**

Figure 1. Silver label

Figure 2. Engraving

Provided a LOP valve manufactured before 2012 is in good condition and has been serviced in accordance with our minimum maintenance requirements, **the valve can be used** with our new PEFS C6 and PEFS F3 systems.

The PEFS system that has the highest working pressure is PEFS F3 (1700 kPa). All LOP valves have been tested to the relevant Type Tests in AS2473.1; Valves for Compressed Gas Cylinders for use with our PEFS cylinders that have a maximum cylinder test pressure of 6 MPa.

Please refer to our [“TECHNICAL DATASHEET – PEFS F3 Valve Assembly”](#) for further information.

In field action

If converting to a PEFS F3 system, remove the Silver label that references “AFFF”

Effective Date: Immediately
