

The background of the entire image is a low-angle, upward-looking shot of several modern skyscrapers with glass facades. The image is heavily stylized with a deep blue color palette. Overlaid on the buildings are numerous thin, white and light blue lines that connect various points, resembling a global network or data flow. Some points along these lines are highlighted with small, glowing white or blue circles. The overall effect is one of technological sophistication and global connectivity.

One vision

Chubb vision studio

The story

Chubb Vision Studio is home-grown, crafted by Chubb experts to add lasting value and drive success for businesses.

In today's connected world we are all used to relying on technology to simplify complex personal lives and navigate multiple tasks through a single interface.

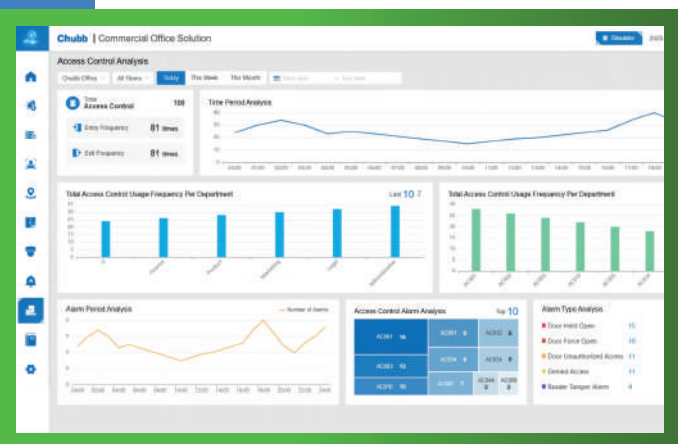

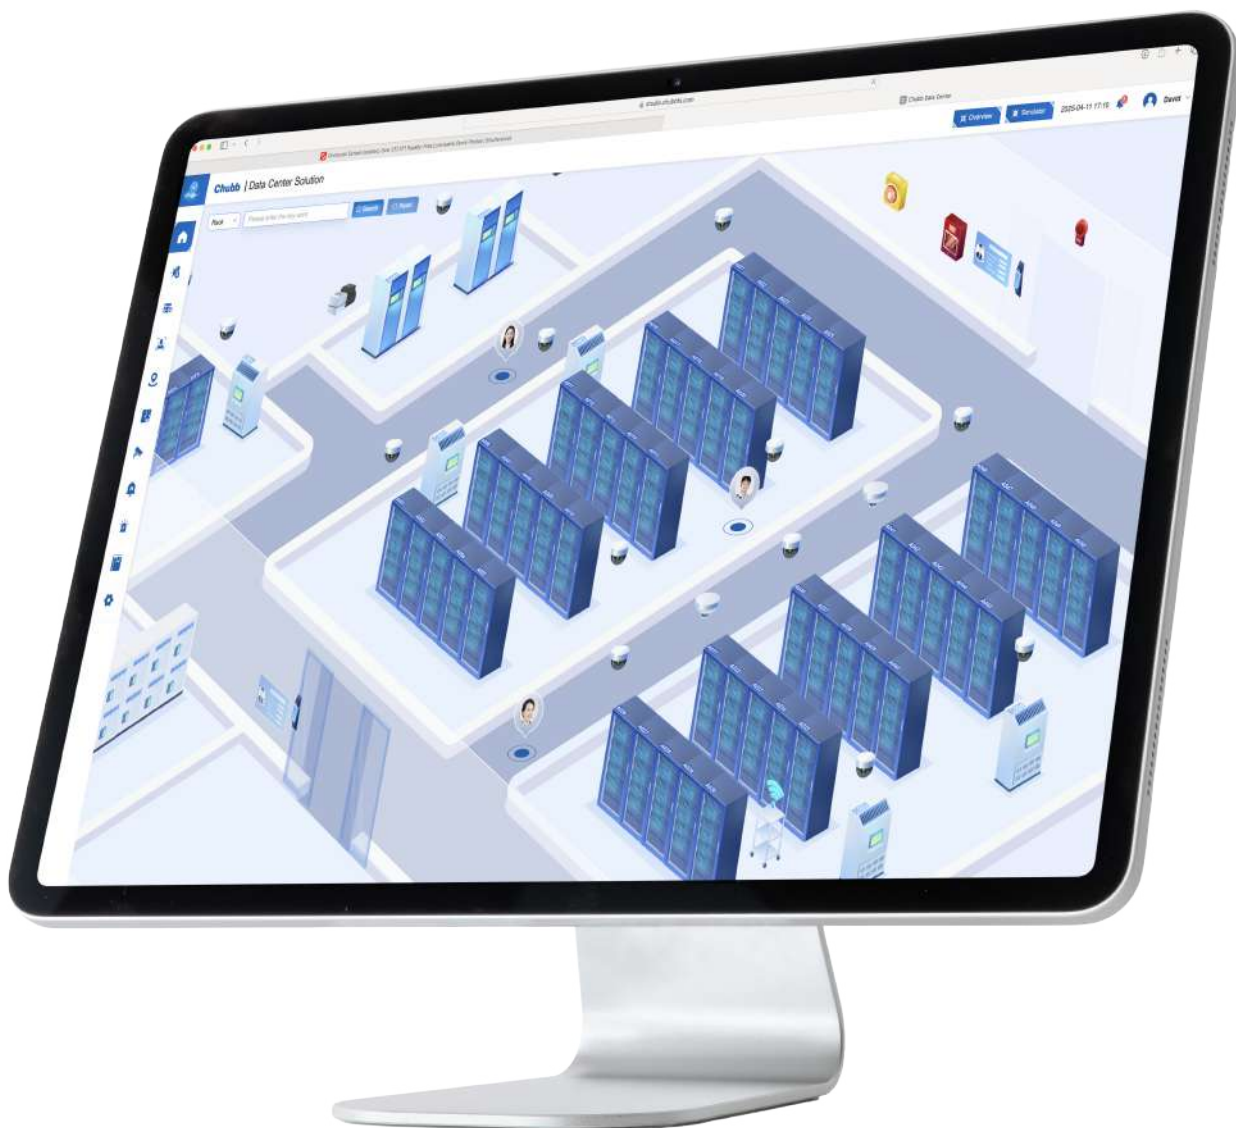

For the businesses juggling multiple applications and programs to manage and protect offices, factories, and facilities, the complexity can overwhelm, making it tough to focus and even tougher to protect what drives your success. Chubb Vision Studio changes that story.

That's why we created Chubb Vision Studio, to unite business systems and deliver professional oversight of people, property and assets, all on one single dashboard.

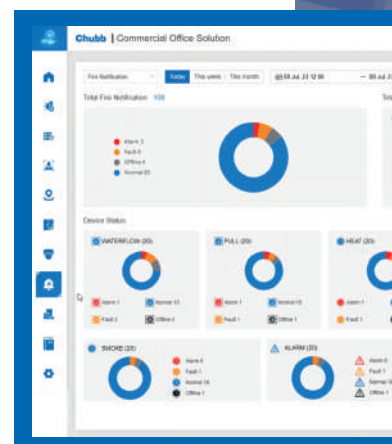

Chubb Vision Studio is a single software platform capable of unifying security, fire, access control, and building systems on one, centralised interface.

With a real-time view of all the information and data they need at their fingertips, Chubb Vision Studio users keep their business, people, and places safe and secure with confidence and clarity.

Created to scale to any size over single or multiple locations, Chubb Vision Studio creates tangible commercial value, enhancing business systems, streamlining processes, and delivering complete control to customers from a single platform onsite wherever they need it.

Empowering buildings and businesses through intelligent vision

The power is always in your hands. Chubb Vision Studio delivers clarity, control, and confidence—uniting systems, sites, and data into one intuitive platform that enhances efficiency, strengthens resilience, and transforms everyday operations into smarter, safer business performance

Smart management

Chubb Vision Studio transforms building oversight into smart management. By unifying every system across sites into one powerful application, it delivers seamless control and synchronization. Businesses gain a single platform to manage operations holistically, eliminating complexity, reducing inefficiencies, and empowering decision-making with clarity. The result: streamlined operations and greater confidence in every action.

Resilience and efficiency

With Chubb Vision Studio, operational inputs converge into one central hub, making facility management simpler and more efficient. By reducing dependence on fragmented, third-party systems, resilience naturally strengthens. Businesses not only optimize day-to-day processes but also safeguard against disruptions—ensuring performance, continuity, and long-term reliability remain firmly under control.

A valuable reality check

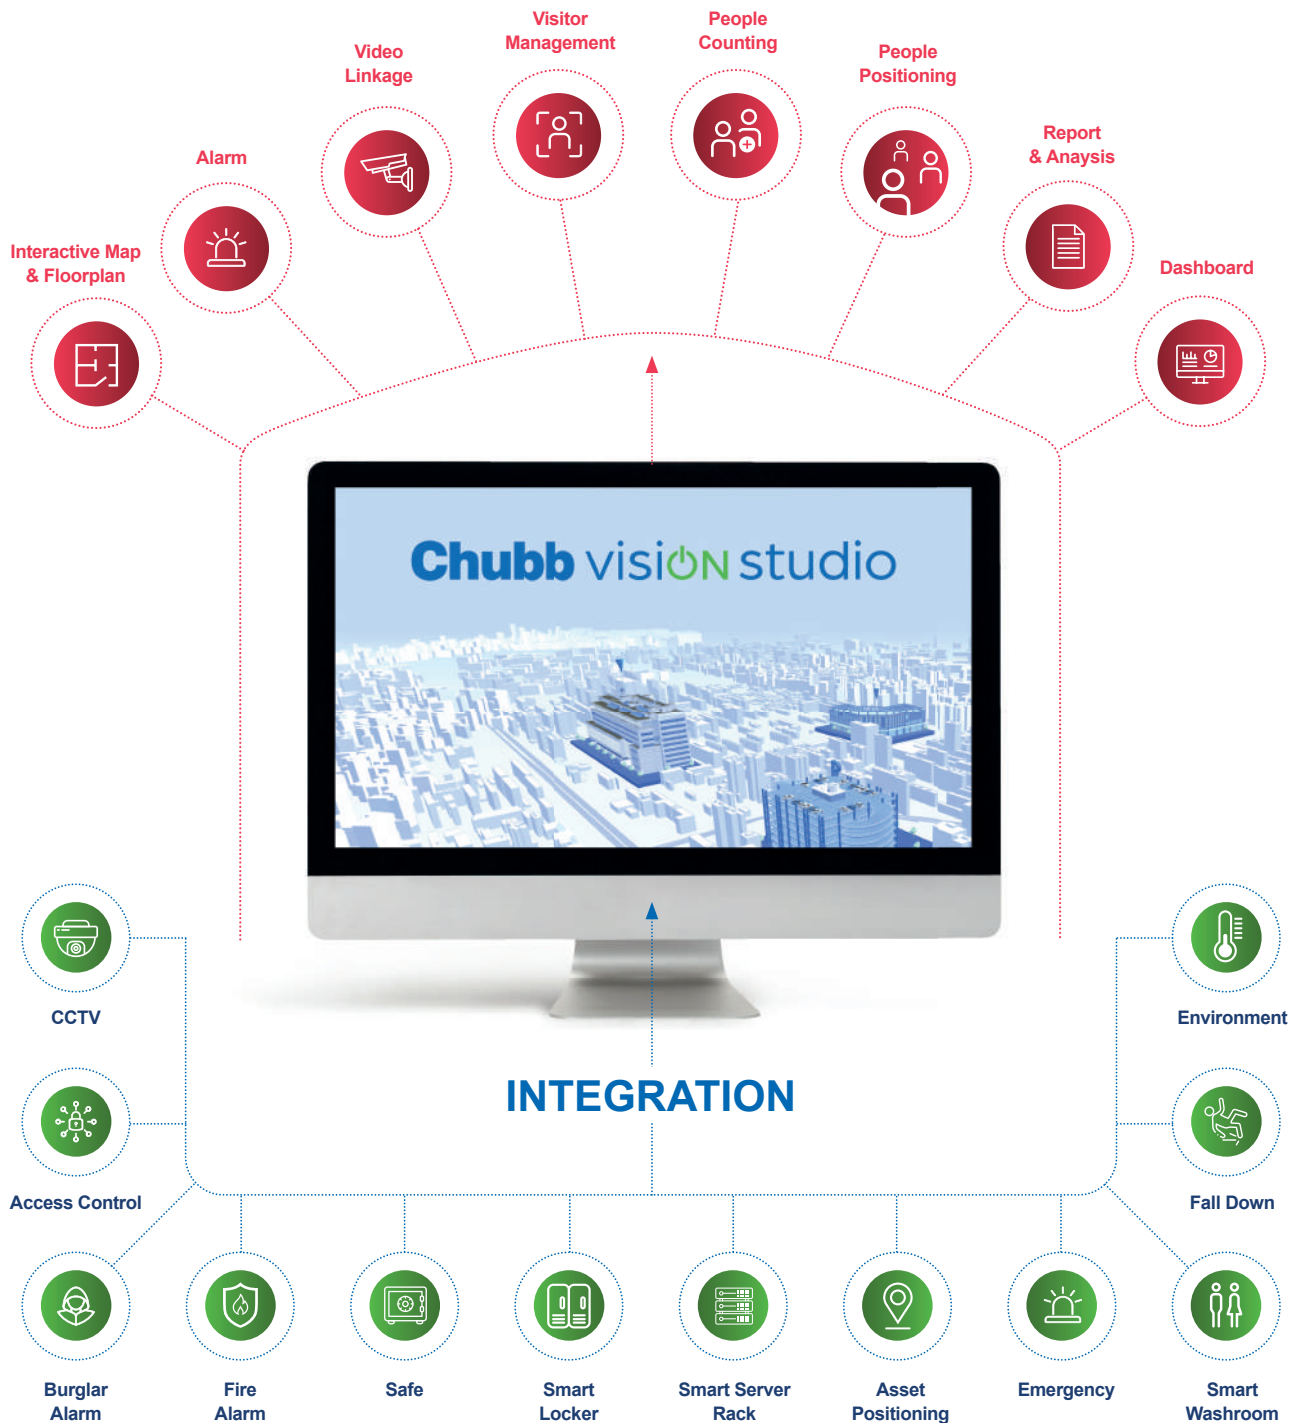

Built around user needs, Chubb Vision Studio delivers unmatched clarity, control, and confidence. One on-site application provides real-time insights, incident resolution, and cross-system visibility across alarms, events, and data. By detecting issues swiftly and effectively, downtime is virtually eliminated. It's the operational reality check businesses have been waiting for: safer, smarter, and more efficient performance.

Seamless integration

Chubb Vision Studio unites not just diverse technologies but also multiple locations, offering a single, intuitive view of every site. Scalable and adaptable, it grows with your business—whether you're an SME or a global enterprise. Integration becomes effortless, visibility expands, and performance strengthens, all through one flexible platform built for today and tomorrow.

One unified platform to transform how you manage everything

Chubb Vision Studio

24/7 worldwide

13:30
